

Face To Face *Marketing*

Public Relations & Content Creation- Every great company has a well written backstory. We are a team of amazing storytellers. We create newsworthy press releases, pitch letters, and print articles for our clients. We take the time to learn about you, your company and your clients. Knowing the demographics and psychographics of each group, helps our team develop the most effective brand story for your business success. You send us the bullet points or brainstorm ideas you have, and we turn it into engaging content designed to pique the interest of your target audience!

We go the extra mile and research media contacts in the location you want to promote your services. Going to do a presentation in Detroit? We will find the best media contacts for us to send your press release or pitch letter for promotion in that local area. Need photography and video for your presentation or event, we do that for you! One price for all the great images we capture. You have full use rights to all content we create for you.

Want to participate in a local BNI group, but just don't have the time to commit? We can represent your company at BNI groups, Chamber networking events, or any other industry networking or meeting. We will deliver your corporate elevator pitch, distribute your company contact information and gather all the contact information from other participants, segregated by the quality of the lead, and deliver to you in a spreadsheet. We can even create a mass mailer that is customized to each recipient and include a graphic in the email body!

Interested? Leave us a message in the chat. Please include your name, email address, and when you would like to schedule a consultation. We'll get back to you ASAP!!

Contact our team at Hello@FaceToFace-Marketing.com for general information about consultations and service implementation.
